

MISSION

We want peace of mind for people and society. That is our mission.

As one of the largest asset managers in Japan and Asia, we will fulfill our social responsibilities.

▶ We respond to our clients' needs over time, in depth and in painstaking detail

Our biggest mission is to increase the precious assets entrusted to us by our clients over the medium to long-term. Our relationships with clients are built over decades, faithfully managing their assets. We believe that our AUM of approx. 67 trillion yen and high market share in defined contribution (DC) pensions are the result of the trust from our clients.

▶ A group of professionals with diverse expertise and track records

Our human resources, including the fund managers and the analysts, are seasoned professionals with diverse expertise. The team responds with optimal proposals to address client issues.

▶ As a responsible institutional investor

As a supporter of Japan's Stewardship Code, and as a signatory to the PRI, we engage with companies in which we invest on ESG (environment, social and governance) issues through engagement and exercise of voting rights. By encouraging the resolution of these issues, we aim to contribute to the sustainable growth of companies and society as a whole. Each of us is personally committed to actively addressing ESG issues.

■ We have signed international corporate conduct guidelines and principles, and in addition to activities to put them into practice, we are involved in engagement through cooperation with the UN, overseas companies, NGOs, etc.
